Talson exhibits FNA Class ATP certified air cargo semi-trailer at 65th IAA

The market leader in the European air cargo sector Talson Trailer B.V. is exhibiting its FNA Class ATP certified air cargo semi-trailer for the first time in Hannover at 65th IAA, world's largest commercial vehicle exhibition. Talson has taken its place in Hall 27, Stand E07.

Talson Trailer B.V. is the leading Dutch expert for box type semi-trailers in Europe, focused on intermodal transport solutions and offers a wide product range of garment semi-trailers, distribution semi-trailers, and air cargo semi-trailers. Patented various technologies, respectively the Talfix®, TalDrive® and TalStep®, Talson trailers are manufactured with uniquely designed light weight, self-supporting chassis, providing more load capacity, without any compromise on durability. Talson's exhibition vehicle at the 65th IAA, TAG FNA, with its insulated upper-structure, enables temperature controlled air-cargo transportation within the temperature range from 0°C to +12°C. With its special designed concorde roof, Talson semi-trailers reach a total inner height of 3,030 mm for improved loading operations.

Established in 1982, today, Talson is the market leader in the European air cargo sector. Enlarging its product range with new solutions and technologies, Talson had launched in 2013, the newly developed Talson FNA Class ATP certified air cargo semi-trailer.

For fast and safe transportation of all goods, Talson semi-trailers are in line with the TAPA (Transported Asset Protection Association) criteria as well as ADR EXII and DIN EN 12642 Code XL.
